

OSWER SUMMER INTERNS – PROJECT DESCRIPTIONS – 2015

1 – Name of Project: Quality Procedures for Remedial Acquisition Framework

2 – Contact Person Information:

Name: Dana Jones

Office: OSRTI

Division/Branch: Human Resources

3 – Project Description

Background of Project Area:

The Remedial Acquisition Framework being implemented by Office of Superfund Remediation and Technology Innovation will be incorporating new quality information related to the construction process into EPA Policy. The intern will be working to compile the Corp of Engineers policy guidance into a form that OSRTI can develop an addendum Quality Policy for EPA use.

Tasks to Be Completed By the Intern:

Compile the documents and procedures that are available from the COE, read and prioritize the materials for inclusion into EPA Policy. This will require the reading of EPA policy documents. Will require coordination with both COE and EPA/OEI

4 – What skills are needed for this project:

Engineering skills at an undergraduate level.

5 – Is travel or training involved? If yes, please provide specifics.

It is expected that the intern will attend no cost training at the COE District Office. This will be local travel into New York City or Philadelphia.
